

Pre-Doc Position Water Economics Universidad de Salamanca, Spain

The successful applicant will work along other predoc and postdoc colleagues on the development of a multi-model ensemble framework within the SWAN Project (<http://wateragora.eu/index.php/about/swan/>).

It is a predoc position based in Salamanca (Spain), with a competitive salary for Spain (same level as Ministry of Science's predoctoral fellowships FPI/FPU) and a duration of 32 months (20+12).

We request a sound **quantitative background (economics, engineering) and digital competences**. Knowledge of mathematical programming/optimization (e.g. GAMS), macroeconomic (e.g. GEMPACK), hydrology (e.g. SWAT) software, and/or statistical computing software (e.g. R) is an asset.

Important requirement: **proficiency in English**.

Candidates can apply online here:
